CHENG HONG E-TECH., LTD

Company Profile

Products profile:

Our mission is to reduce matters and cost for our life and work behavior, benefit people.

Our flagship products are the unmanned installing type LED lamp, safe and easy to be installed on ground, no need the ladder.

To the traditional lamp, we have to call the electrician to install the lamp with much cost, the electrician have to use the ladder or aerial work platform, the maintenance cost is much, the risk is high. Especially in multi-storey halls, the ladder is not long enough, the aerial work platform is difficult to load up floors.

According to these matters and our new type lamp, we researched the different unmanned installing bars. The manual motive bar is working for common height ceiling, semi-automatic bar for middle height ceiling, fully automatic bar for super height ceiling.

So now the maintenance become very safe, easy and timely. And the cost and risk are very low!

Service profile:

We focus on the suitable solution about the products and projects via our innovation, and develop the finished products.

Welcome to share your requirements!

Name: Down Light

7W - 70W

EDL Series Feature:

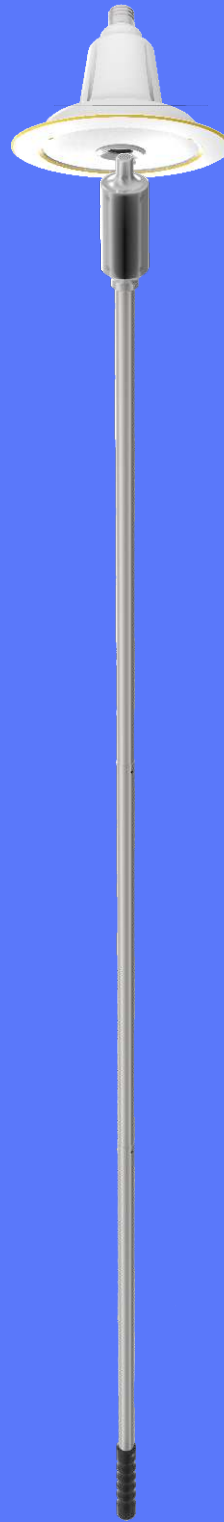

1. Supports to install and disinstall with E27/E26 base by handling bar ;
2. Reduce the risk of high-altitude operation, reduce much maintenance cost ;
3. Simply and safely replace the lamps without Electrician, no need ladder ;
4. Supports 3 - 10 meters height ceiling stallation by the different solutions ;
5. Availably maintaining in multistorey halls building by different telescopic rods ;
6. Supply manual and semi-automatic handling bar as optionals ;
7. All models are protected by patents for invention, utility model and design ;
8. Supports 7W-40W with different size design type and heatsink ;
9. Supports 2 - 5 years guarantee ;
10. Accept ODM and OED order ;
